

Unlock your next big move with the

# EzyPortal

Interactive Tree Portal

A valuable resource for residents, businesses, and local authorities

- **Central hub for tree-related information within a community**
- **Fed directly from data held in Ezytreev**
- **Interactive GIS mapping of local tree populations with filterable views and layers**
- **Option to create tree routes to explore local green spaces, with featured walks highlighting notable/most valuable trees, future planting or species of interest**

Powered by

# Community Tree Portal

Take the next step—connect your community with urban trees through ezyPortal. Give your residents unprecedented access to information on the borough's trees on public land.

## Tree inventory

Dashboard providing overview of whole tree inventory, plus individual tree data delivered via GIS mapping. Users can identify trees, view a photo and basic information.

## Inspection & maintenance records

User definable information from the most recent inspection & optional history of work performed to each tree.

## Tree eco benefits

ezyPortal also integrates with i-Tree Eco benefits API or inbuilt Tree Carbon Storage & Sequestration Calculator, presenting the environmental benefits these trees provide.

## Planting and felling planning

The platform highlights locations for upcoming tree planting and identifies areas scheduled for felling, helping residents see where changes are planned.

## Tree related enquiries

Allow the public to submit an enquiry about any tree via GIS mapping including uploading photos.

## Integration with CRM

Enquiries from ezyPortal can be forwarded to a corporate CRM system, Ezytreev E&C module or a dedicated email inbox.

The screenshot displays the 'Details' tab of a tree's profile. It includes a satellite map view and a list of eco-benefits:

Category	Value
Dry Weight	11.9 tonnes
Total Carbon Stored	5.964 tonnes
Total CO <sub>2</sub> Sequestered	17.9 tonnes (£1,520.85)
Annual CO <sub>2</sub> Sequestered	113.9 kg (£9.68)

Additional details shown include: ID 496792 (Single tree), Species: English Oak, Site: Brent Valley Golf Course, Estimated height: 15 m, Age: Mature, Estimated crown spread: 16 m Diameter, and Tree Asset Value (CAVAT): £179,205.

The screenshot shows the 'Tree layers' panel with the following options:

- Existing trees
- To be planted winter 2025/2026
- Potential new planting location
- Potential replacement planting

Below the layers is a link: [Using the map with the keyboard](#) and a button: [Make an enquiry](#).

# Protected Tree Portal

Avoid time consuming enquiries by encouraging the public to use this online self-service portal.

## Register of tree preservation orders

Any member of the public can access information and view all related details, plus download legal documents of all TPOs.

## Register of tree works applications / notifications

View current and previous applications to carry out works to TPO and conservation area trees.

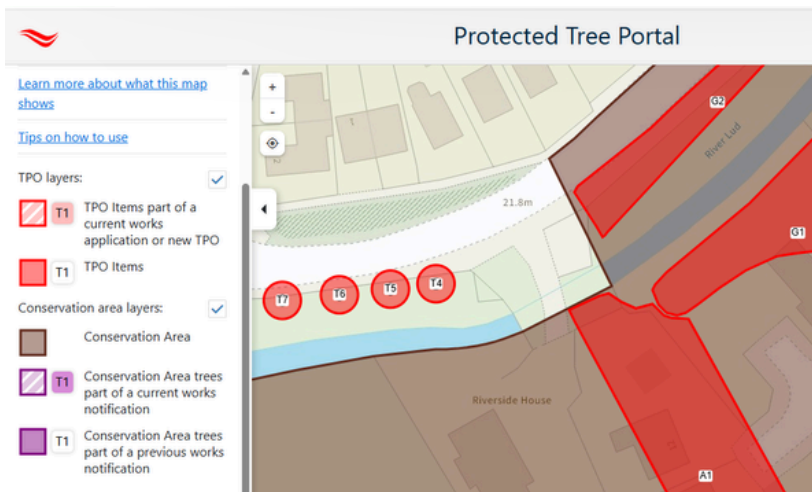

## Protected tree map

Any member of the public can use the map search to find trees or property they are interested in & find out if a tree has a TPO or is in a conservation area, see details of where it appears on the protected tree register and download legal documents.

## Application to carry out work

Any member of the public can submit an application for works to tree(s) protected by a TPO or a conservation area notice. Applicants can create their own sketch-plan using GIS mapping, upload documents and see their application progress via the portal. Ezytreev will automatically create an application record based on the completed form.
